

## HARNESS SOLUTIONS, INC.

# NAME OUR NEWSLETTER

Between now and January 31, 2012 we will be accepting submissions on Facebook to name our newsletter. The winner will receive a \$50 gift card to Amazon.com! Please visit [www.facebook.com/harnessolutions](http://www.facebook.com/harnessolutions) for complete rules and to submit your entries. The winning newsletter title will be announced in our February issue.

### Solutions to 4 Common Drug Discovery & Development Process Obstacles

- 1. Tracking amount of gas/liquid sample remaining in columns.** Easily and accurately track remaining amounts of gases and liquids found in columns. Up-to-date information increases efficiency and productivity.
- 2. Expired dates for standards, reagents and calibration dates for instruments.** Harness RISCC is an auto-identification solution for managing and tracking reagents, biochemicals, and standards expiry dates. Even with tight QC procedures the management of expired reagent inventories is a manual task susceptible to human error. Harness RISCC automates the process and includes comprehensive reporting and alerting tools for monitoring and forecasting regulatory compliance status. Highly configurable, the solution is tailored to match your QC process needs.
- 3. Maintaining books of assays and additional research data for easy access.** When lab inventory or documents are misplaced, time is lost manually searching and lab productivity falls. Increase lab associates productivity by approximately 20 percent and improve morale in your work environment with reduced time consumed for nonproductive overhead.
- 4. Ability to easily search large quantities, including samples stored within stability chambers.** Manage inventory behind closed doors. Harness RISCC does not require you to be in view of a label in order to detect an item. The multiple tag read/write feature permits you to search large quantities in minutes with a zero error rate.

## Solutions for the Life Sciences Industry

“Harness Solutions [is] invested in the process and technology to our satisfaction; the key selection criteria [was] the commitment demonstrated through POC development to meet business needs in compliance to all regulatory requirements.”

- Department Head, Major Pharma Company

## New Implementation for VerGoPharma Research

Reagent expiry dates and lab instrument calibration dates are a common compliance concern driving Quality Control departments to employ considerable resources among the pharmaceutical industry. VerGoPharma Research proves to be an innovative leader by incorporating Harness RISCC RFID software into their business practices this month.

Harness RISCC increases GXP Compliance levels by proactively identifying potential quality non-compliance events. The software is CFR 21 compliant, and sends automated event based alerts, notifications and reports proactively. With the automated Quality Control function, VerGo will now be able achieve higher levels of productivity with greater confidence.

"We are very excited to work with VerGoPharma," states Manish Mandelia, President and CEO of Harness Solutions. "Dr. Borkar has a value for technology that combined with his innovative viewpoint will allow Harness RISCC to be used beyond its current capabilities."

### Features of Harness RISCC

- Improve inventory accuracy up to 99%
  - Improve capital investment visibility by real time inventory information
  - Increase lab chemical reagents inventory management efficiencies
  - Search and locate lab items and documents
  - Improve operational effectiveness and profitability
  - Locate hidden inventory behind closed shelves and drawers
  - Identify and locate missing and out of place inventory
- Increases GXP Compliance level
  - Proactively identifying potential non-compliance events
  - Automated event based alerts, notifications and reports
  - CFR 21 ready
  - 100% audit ability for increased compliance
- Combat counterfeiting across supply chains

### Redesigned [www.HarnessSolutions.com](http://www.HarnessSolutions.com) Website

We are pleased to announce that earlier this month we launched our newly designed website. Through our website you are able to access product information, press releases, company information, solutions we provide for our customers and much more!

### About Us

At Harness Solutions, Inc. what sets us apart from our competitors is our ability to provide our customers with fully integrated, turn-key solutions. Not only do we implement the best possible technology, we offer a close, hands-on relationship throughout the process.
