**By Harness Solutions (I) Pvt. Ltd.**

# Agenda

- ✓ About Harness
- ✓ A brief about RFID Technology
- ✓ Features offered
- ✓ How will the technology work?
- ✓ RFID Advantages
- ✓ Benefits for you
- ✓ A few cases to ponder on..

# Features specially Offered for Banks

# Harness RFID - Special Features for Banks

## Features -

- ✓ High Net Worth Individual Identification (HNI)
- ✓ Customer Passbook Management
- ✓ Documents / Files Tracking
- ✓ Asset Tracking
- ✓ Tracking courier bags
- ✓ Locker Management

# HNI Identification - The Concept..

- ✓ **HNI(High Net Worth Individual) Identification** is a feature which enables banks to identify their most valued customers and helps the bank staff serve them in a better manner.
- ✓ Each customer will be given a Harness-card which will be RFID enabled.
- ✓ Harness card will store all the relevant data of the customer, which help the bank to serve him/her better.
- ✓ This feature will also assist the bank in cross selling its services / products based on the history of past interactions of that customer.
- ✓ This will also help banks in keeping their premium customers informed about new products, services, promotions, offerings etc.

# Working of the system – HNI Identification

- ✓ Bank will attach a Harness RFID tag to the customer's bank card
- ✓ Whenever an individual enters the bank premise, Harness-reader mounted on the gate will respond, a greeting message can also be displayed on the digital screen. Also, the message of his arrival will be popped up on the concerned officer's screen to make him/her ready to welcome the customer warmly.
- ✓ At the same time, the officer can also have his/her account information ready, so as to serve him/her promptly.

# Working of the system – Passbook Management

## Passbook Updating and Management

- ✓ Harness tags would be attached to the passbooks. As soon as the reader read the tag on the passbook, the system will open its account. Passbooks can be updated easily without human intervention.
- ✓ Bankers don't have to search each and every booklet to find the desired passbook.
- ✓ Similarly other files and documents can also be tagged to keep track.
- ✓ Harness System is very useful for document tracking and management.

# Working of the system – Documents/Files Management

## Documents / files Tracking

- ✓ Banks have a large number of files and documents, which has to be stored for years.
- ✓ To keep track of each and every document/file is a cumbersome job.
- ✓ Harness System is very useful for document tracking and management.
- ✓ Harness tags would be attached to each and every Files/Documents.
- ✓ Harness will provide a handheld HarnessReader for keeping Inventory of each asset and to track these files/documents as and when required.
- ✓ Required file name/number will be entered in the search option of this reader , a search which takes a few seconds will find the document as soon as it comes in the range( range is from 5 feet to 25-30 feet).
- ✓ A proper filing system can be created with the facility of Inventory which takes hardly any time even daily basis, if required.
- ✓ Report of misplaced and missing Item can also be generated for quick response.

# Working of the system – Asset Tracking

## Fixed & Movable Asset Management

- ✓ Banks or any organization has number of assets used for various activities, like Computers, Printers, Air conditioners, Laptops, fixed and movable furniture, Display boards, LCD monitors, costly stationery Items and many more.
- ✓ To keep track of such Items is not easy job. Harness System will keep track of all the Assets.
- ✓ Harness will also keep track of details like warranty, guaranty and due dates for service of all the equipments, and will send alerts for the same to the concerned departments.
- ✓ Harness tags would be attached to each & every valuable asset of the bank.
- ✓ Many of these Items has to be used among many staff members or between many departments.
- ✓ Regarding usage of a particular equipment or a staff in a department can be easily calculated.
- ✓ The information thus obtained helps to maintain accountability of each department.

# Working of the system – Courier Bag Management

## Tracking courier bags

- ✓ Harness tags would be attached to the courier bags to be dispatched to other branches. All relevant information would be feed in the system.
- ✓ Now tracking of the bags is the responsibility of Harness System.
- ✓ As soon as bags moved out of the premise, records are updated with real time information of moving time.
- ✓ Similarly as they enters the premise of other branch, they are received by the Harness Readers too.
- ✓ All the information is readily available to monitor in all the branches.

# Working of the system – Locker Management

## Locker Management

- ✓ Harness Id\_Cards will be provided to all locker members. These cards will have all the necessary information of the member and locker number.
- ✓ Member's thumb impression will be stored with other details.
- ✓ As soon as the Harness reader reads the card, all the details including the photograph will be displayed on the computer screen.
- ✓ For more security, thumb impression can be verified.
- ✓ This system will provide full security, as the cards are temper proof.
