# HARNESSESS

*Connecting the physical world with the information world*

## Overview

- Save in millions annually by improved inventory management
- Improve inventory accuracy up to 97 to 99%
- Harness RISCC™ enables GXP compliance
- Addresses upcoming e-pedigree compliance
- Easily locate technical documents
- Harness RISCC™ is CFR 21 compliant
- Harness RISCC™ has been computer systems validated

*R&D and Manufacturing Compliance*

## Advantages

### **Increase lab associates productivity**

Increased scientist morale because of reduced time consumed for non-productive compliance overhead

### **Increase GXP Compliance level**

Pro-actively identifying potential non-compliance events  
Automated event based alerts, notifications and reports

### **e-Pedigree Compliance Preparedness**

Increased supply chain inventory management controls  
Improve capital investment visibility by real time inventory information  
Combat counterfeiting across supply chains

### **Improve operational effectiveness and profitability**

Increase lab chemical reagents inventory management efficiencies  
Search and locate lab items and documents

*Trace and Track Capabilities*

*Document Management*

## Features

- Wireless inventory and compliance controls execution in minutes
- Configurable notifications events and recipients
- Receive pro-active information about potential non-compliance events
- Locate invisible/hidden inventory behind closed shelves and drawers
- Identify and notify missing and out of place inventory
- Index, search and retrieve technical documents
- 100% audit ability for increased compliance
- Customizable reporting and business intelligence
- Out of box integration capabilities with enterprise systems
- Integrate or extend LIMS functionality
